	Women who are financially literate gain more confidence in their own decision-making
Objective of the event	Women can help deal with rising costs of living and inflation if they are financially literate.
	Women tend to live longer than men, and thus they should have the knowledge to carry on their day-to-day affairs and manage finances.
Outcome of the event	Financial literacy would help the women in making better financial decisions and helps in the utilization of financial products and services. It is very encouraging to see that today women are at par with men in all fields but when it comes to financial decision-making, they are still dependent on the male members of their family.
